Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. Species of the embodiment disclosed on page 30, line 8-10; in particular, wherein the optional color processing condition is a color condition corresponding to one of the plurality of color image output apparatus.

II. Species of the embodiment disclosed on page 33, lines 8-23, in particular, wherein the optional color processing condition is determined by performing a weight process of the color processing conditions corresponding to each of the color image output apparatus in accordance with a distribution condition of the distribution process.

III. Species of the embodiment disclosed on page 32, lines 10-15, in particular, wherein the optional color processing condition is an average values of color processing conditions corresponding to the plurality of color image output apparatus.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
